Work Ethic	5/10
<p>More effort could have been put in from the early stages of stage 4. Could show more initiative to take on tasks. Work ethic showed improvement towards the latter stage. Demonstrated initiative to coordinate aspects of deadline day.</p>	

Quality of Work	6/10
<p>Overall quality is fine. However, some notable mistakes in documents. Some documents not checked for quality such as dummy data left in Review-template and Work log not being fully updated when asked.</p>	

Punctuality	7/10
<p>No notable lateness or absences. Some deliverables are not completed on time but on the next morning.</p>	

Overall	6/10
<p>Effort can be good when engaged. General mood is good.</p>	

Areas of Improvement
<p>I would like to see more input and engagement during meetings. I would like to see an improvement in the quality of work – review documents before pushing to git and checking they are accurate.</p>

Additional Comments
<p>Headphone and social media ban during group meetings.</p>
