

1 hr 17 min (recording): question to Miles (adding logins, amending roles, changing passwords, deleting logins)

20190228

To do:

- Documents → convert to pdf.
- Evidence → convert to pdf.
 - ↳ Add GIANT chart.
- UML (Yuanzeip) → Update Class & Use Case diagram.
 - ↳ Class: Add enums. (and session)
 - ↳ Use case: Authenticate: add other user types.
- Code → Database (Consider SQLite in Java, finish stage 5)
 - ↳ mockup for stage 4:
 - Personal Details
 - ↳ mockup: Hash/Map (employeeID, PersonalDetails)
 - ↳ new class PersonalDetails
 - ↳ needs read & write methods.
 - Enums
 - Roles
 - ↳ need a list of permissions each.
 - Permissions
 - Personal Details
 - READ_PERSONAL_DETAILS
 - ↳ Read - my details
 - ↳ ~~Read - others details~~
 - AMEND_PERSONAL_DETAILS
 - ↳ Amend my details
 - ↳ ~~Amend other details~~
 - ↳ Create details
 - Annual Review
 - ↳ ExitCode
 - ↳ get description.
 - Session
 - ↳ use exit code enum.
 - Authenticator
 - ↳ use Role enum instead.
 - Authorisation
 - ↳ check whether role has permission.

Sort existing docs into those folders.
