Punctuality	9/10
Attended all meetings with very little lateness and greater management of time.	

Work Ethic	7/10
Has had a good work ethic to begin with but the stretch has made all of us tired and productivity has dropped from Marin.	

Quality of Work	7/10
The quality of work Marin has put through in this stage has been great in terms of code however there is efficiency to be desired in his work process.	

Overall	8/10
He has managed the team well and put other before himself making him an effective team leader.	

Areas of Improvement
Allowing more time before starting a task.
