

Dear Miles,

We would like to ask some additional questions about a few points discussed in our recent meeting. The questions discussed were as follows:

Upon review of our changes to the provided scenarios, we have made an assumption in the design of "read past completed review records", due to ambiguity in the normal flow of how records are shown to the user.

We've updated the use cases assuming a condensed list is provided to the user, from which the user selects one to read in full.

We are unsure whether you intended for a list to be shown to the user, or if all records are meant to be displayed at once.

If our assumption is incorrect, please notify us of the intention so that we can make appropriate changes.

Thank you for your time and we gladly await your response.

Kind regards,

A handwritten signature in black ink, appearing to read 'J. Ghoorbin', with a horizontal line underneath.
