Marin Donchev [MD485]	James Dyer [JD556]	20190303	4

Punctuality	8/10
Always attends meetings on time, adhering to our "show up early" policy, work isn't always completed on time, but this is often work that isn't critical or work that wasn't given a reasonable time frame for completion.	

Work Ethic	9/10
Actively contributes to meetings, completes work by the time it is required, takes initiative and does work individually if work is not assigned to him, work is also consistently done at a high standard.	

Quality of Work	10/10
Work is always done to a high standard and rarely requires alterations or review, care is often taken to do work at the best James can accomplish and it shows.	

Overall	9/10
James' quality of work is far above average as well as his engagement and involvement in the project.	

Areas of Improvement
Has difficulty thinking of things in a non-literal sense, for example the use case diagrams and class diagrams not being 1:1 representations of our codebase, this is largely unimportant due to team members with a better understanding of these areas but does limit the usefulness of his feedback in this regard.

Additional Comments
Performs very well but doesn't always give himself enough time to rest, this doesn't effect his work but is a bad habit to maintain long term.
