

Dear David,

We would like to ask some questions about a few points discussed in our recent meeting.  
The questions discussed were as follows:

The Stage 5 brief states “The corpus folder must contain at least a sub-folder called source (or Source) that contains everything relevant to the source code of your implementation, including libraries and test materials”. Should this folder now be named “Source” and not “Source-IDE” as in previous stages?

Thank you for your time and we gladly await your response.

With Thanks,

James Dyer
