Marin Donchev [MD485]	James Dyer [JD556]	20190325	5

Punctuality	10/10
Meeting attendance still impeccable and no assignments were over run in this stage.	

Work Ethic	10/10
Works far past what is expected of him, without having to be asked or cohered.	

Quality of Work	8/10
While James still does the best, he can do in all matters he tends to overthink certain features and this has led to an overcomplication of the requirements at this stage, while the work itself was of high quality it was out of scope of the rest of the project.	

Overall	9/10
The effort put into this stage has far exceeded what was necessary, but in an undirected setting work occasionally goes off the rails in technical complexity.	

Areas of Improvement
Needs to think of things in a more pragmatic sense in terms of the expectations of him and the project he is working on.

Additional Comments
Like the past review overwork is still a large factor with James, although during this stage it was largely my fault due to improper planning. The dedication within this stage though was very impressive should be taken note of.
