YUCONZ

Meeting Minutes

Meeting purpose:	Workshop
Date:	
Time:	12:00-13:00
Location:	CSPC1
Attendees:	Jamie Ghoorbin [JDG23], Marin Donchev [MD485], James Dyer [JD556], Nicholas Salter [NDS8]

Next Steps:	Checkpoint date:	Assigned to:	Due Date:
Try IntelliJ			
Try NetBeans		JDG23	

Points to discuss next meeting:
Meeting on Thursday 1600-1800, book room in case of meeting on Friday

Decisions made: (what, why, impacts)
1.

Miscellaneous details:
MD485 brought a typewriter. An amendment to the meeting regulations may need to be made concerning this in the future.

Discussion:

1. Stage 3 Brief
    a. Ask David Barnes about Deliverables conflicting with themselves
        i. Part one Documents.zip says "If you have updated the use case scenario descriptions, then include a PDF version of those in this archive."
        ii. But part three says "If you have updated the use case scenario descriptions then they must be submitted as part of the previous item - Evidence.zip"
    b. Also note: Login authorisation records have conflicted requirements.
        i. Point 3 says "All authorisation attempts must be logged ..."
        ii. Point 7 says "There is currently no requirement to record failed login attempts"
    c. MD485 summarised points on the brief.
    d. Noted that "Directors may view any records with the exception of personal details records" (Point 4)
    e. Brief specifies "Note that BlueJ is not considered to be a suitable environment for developing the implementation and BlueJ projects will not be accepted." (Deliverable 4).
        i. May want to specify this in Group Policies with regards to the Yuconz project.

2. Add a revisions document stating where all changes to planning documents are made, ot make it easier for Barnes to mark
    a. "Stage 2: Changed these items in these planning documents from sth to sth else"
3. Discussed different IDEs, since deliverable needs to be submitted after exporting from a specific IDE
    a. Ruled out Eclipse.
        i. All members have trauma from Papyrus.
    b. Considered NetBeans.
        i. No prior experience with this IDE.
    c. Group decided to use IntelliJ.
        i. Highly recommended by two members (half)
        ii. Free 1-year licence for students (repeatable)
        iii. Final decision delayed until all members have had opportunity to try IntelliJ.
4. Need to take a look at provided diagrams and scenarios during each member's own time by the Thursday meeting
    a. Create your own conclusions about the diagrams and how they differ from the ones we submitted, decide how to alter our scenarios and diagrams for this time.
    b. This will be enforced disciplinarily.
5. Also read the brief. Understand it.
